■ About Credit Card Payments

[How to pay by credit card]

The credit cards listed below can be used to make payments.

- **Visa, MasterCard®, JCB, AMEX, Diners Club**

This system supports 3-D Secure for certain cardholders in order to provide a more secure online payment experience.

** What is 3-D Secure?

The payment system obtains information (IP address, browser used, operating system, etc.) from the terminal used for card payment. As a result, only when the system determines that there is a high risk of fraudulent use, it asks the user to enter a password registered on the card brand site (see below).

[Verified by VISA\(used by VISA\)](#)

[MasterCard® SecureCode™\(TM\)\(MasterCard®\)](#)

[J/Secure™\(TM\) \(JCB\)](#)

[American Express Safekey\(AMEX\)](#)

[3-DSecure\(Diners Club\)](#)

[Attention]

- UnionPay(銀聯) cards are not accepted.
- Some issuers allow cardholders to use the same password they have been assigned for accessing their monthly statements online or having them sent by email. If this password is not entered, or if an incorrect password is entered, the online transaction will not be completed.
- If you forget your password or experience other authentication-related issues, please contact your credit card issuer. (For more information, see your credit card issuer's website.)
- If you interrupt the process on your card issuer's authentication screen, the payment will not be completed. You also will not be able to return to the application page. In that case, please log in again from the top page and proceed with the payment. (Do not use your browser's Back button.)
- In case the payment cannot be made, please confirm the card number and expiration date and proceed again. Or try with another credit card.
